THE BIG EZ

HIGH-VOLUME PALLET BOX FILLER

The Big EZ is well suited to high-volume jobs like off-harvest box filling, and handles up to 100,000 lbs per hour continuously. Its patented filling process moves product into boxes gently and efficiently.

100,000 lbs
per hour

60 x 90 in
floor space

8 to 10 ft
in-feed height

Optional
simple indexer

Specifications

Adjustable height	In-feed height adjusts to suit your needs, from 8 to 10 ft.
Customizable specs	Variable voltage to meet your needs, from 120 to 240 V single phase or 120 to 600 V three phase. Standard equipment is 220 V single phase.
Controls	Ultrasonic sensors, variable speed drive, PLC controlled and HMI operated.
Top-name components	Top-name components give thousands of hours of low-maintenance production, and spare parts are readily available.
Small footprint	This large machine needs only 60 by 90 inches of floor space.
Very quiet	Adds nearly no noise to the production floor.
Easy to clean	Extend the chute and open the exit door by hand, and contact surfaces can be cleaned and disinfected in minutes.
Transportable	Plug-in-and-play design and reinforced fork pockets let you move it between locations with no major dismantling.
Easily integrated	Ties into any production line with a simple dry contact signal.
Easy to install	No significant structural or electrical changes to your line are needed.
Optional additions	High-visibility light indicator, a remote control for the operator, and a simple indexer.
Simple indexer	Works like a conveyor: it feeds empty boxes under the Big EZ from the left, and when a box is full it moves it out to the right while the next empty box moves in.

CONSIDER IT HANDLED.
