EZ DOWN

TOTE BAG AND PALLET BOX FILLER

The patented EZ Down gently lowers potatoes, onions and other produce into a tote bag or pallet box without bruising or marking them. The built-in buffer hopper lets you change bags or crates without stopping your production line.

50,000 lbs
per hour

48 x 65 in
floor space

11 ft to 13 ft 6 in
in-feed height, tote bags

8 ft to 13 ft 6 in
in-feed height, boxes

Specifications

Adjustable height	In-feed height adjusts to suit your needs: 11 ft to 13 ft 6 in for tote bags, and 8 ft to 13 ft 6 in for boxes.
Customizable specs	Variable voltage, 220 V single phase or 220 V three phase. Standard equipment is 220 V single phase.
Controls	Ultrasonic sensors, variable speed drive, PLC controlled and HMI operated, with durable, precise load cells and a weight scale interface.
Customizable orientation	The modular design allows a 360 degree in-feed orientation.
Top-name components	Top-name components give thousands of hours of low-maintenance production, and spare parts are readily available.
Small footprint	Needs only 48 by 65 inches of floor space, so you get high productivity in a small area. No need for a double hanger or a second fill spot.
Very quiet	Adds nearly no noise to the production floor.
Easy to clean	Extend the chute and open the exit door by hand, and contact surfaces can be cleaned and disinfected in minutes.
Transportable	Plug-in-and-play design and reinforced fork pockets let you move it between locations with no major dismantling.
Easily integrated	Ties into any production line with a simple dry contact signal.
Easy to install	No significant structural or electrical changes to your line are needed.
Optional additions	High-visibility light indicator and a remote control for the operator.

CONSIDER IT HANDLED.
